

Customer satisfaction is the goal of every company. At Perry Construction Management we know we are only successful when our customers say we have been successful. It is gratifying to share these direct customer quotes about how we did and the positive impact we have made on their business.

“PCM is the **only company** I trust to **execute my capital projects.**”

Director of Capital Projects

Pikeville, KY

“I had a **\$42 million dollar capital project** that was creating daily headaches. Contractors were failing to follow our rules and regulations, forcing work stoppages. The schedule began to slip which **threat-ened to push us beyond our start up date. PCM** came in and **quickly got things under control.** Now, I don’t start a capital project without them.”

Senior Capital Projects Manager

Zanesville, OH

“We brought (Perry) in to coach us on better capital project execution. Ron quickly discovered a massive oversight on an active project. Everyone who was there that day **literally owes their lives to Ron** for preventing a combustible dust explosion that most certainly would have occurred had he not stepped in.

We’ve hired **PCM to oversee all of our capital projects** after that.” *Plant Engineering & Facilities Manager*

Atlanta, GA

“Perry understands our needs and what the engineering design firm needs. They take the reins of the project from inception to closeout and deliver it safely and efficiently. Their staff understands and man-ages a job site to the highest safety standards, maintaining the integ-rity of a food safe environment through proper management of GMPs. PCM **exhibits their expert capabilities project after project.**”

Project Manager, ESP

Blue Anchor, NJ

“**Highly recommend Perry** for construction management especially for the **expertise and focus on safety programming** and management. There is an unparalleled sense of ownership from Perry to deliver results while building relationships within the project team. Exceptional service from Perry, top-to-bottom.”

Client Program Manager

Indianapolis, IN

“PCM came in during the design phase of a multi-million dollar manufacturing equipment installation. Our design team was struggling to find a route for an ammonia pipe from the roof through to the production floor, putting the entire project at risk. PCM came up with an easy and safe way to route the pipes. This recommendation **saved us more than two weeks and hun-dreds of thousands of dollars** which more than paid for their fees.”

Plant Engineering and Facilities Manager

Zanesville, OH

Rialto, CA

“PCM is **unmatched in leadership, value and expertise.** They are my first call for project execution.”

Vice President of Engineering
